Introduction and Purpose

This Quarterly Sewer Status Report has been prepared pursuant to Section 17 of the Stipulated Order entered on 9/30/2023, which states that the ITPM shall submit to the Parties and file on the Court’s docket written status reports on its progress in implementing the Stipulated Order.

Section 1: Summary Tables of Sanitary Sewer Overflows and Bypasses

1.1 Sanitary Sewer Overflows (SSOs)

Prior to the effective date, there were hundreds of SSOs that had been unresolved by the City of Jackson. Those are listed in Appendix A. JXN Water is committed to resolve all SSOs and as the historical SSOs are resolved they will be removed from Appendix A.

The date, time, location, source, estimated duration, estimated volume, receiving water (if any), and cause of all Sanitary Sewer Overflows occurring during this reporting period are listed in Tables 1, 2, and 3.

Table 1. October Collection System SSOs

Section 2: Narrative Report

Because of a chronic failure to properly operate the Sewer System over a period of years, on September 30, 2023, the U.S. District Court for the Southern District of Mississippi entered a Stipulated Order on the Sewer System and appointed an Interim Third-Party Manager, Edward “Ted” Henifin, and JXN Water to maintain the City of Jackson, MS Sewer System. This quarterly report summarizes activities affecting the operation of the Sanitary Sewer System serving the City of Jackson, Mississippi during the 4th quarter of 2023.

2.1 Projects and Activities

JXN Water staff evaluates all the sewer calls that are called into the City for concerns. All locations of concerns are evaluated to confirm the sewer issues and are dispatched to the appropriate team to address the issue. JXN Water hired Closed Circuit Television (CCTV) and Construction contractors to help address the hundreds of sewer issues found throughout the City of Jackson, Mississippi.

The JXN Water team have been evaluating the 2,200 outstanding service requests inherited from the City. JXN Water has reduced the number of outstanding requests to less than 900 service requests. CCTV Contractors has cleaned and televised over 125,000 linear feet of sewer since the Stipulated Order was entered.

Using the results of the extensive televising of the sewer system, Construction Contractors has been busy throughout the city completing repairs to the sewer system. Sewer issues such as cave-ins and collapses have been evaluated and repaired to eliminate the Sanitary Sewer Overflows throughout the City. During the quarter, Construction Contractors repaired over 90 sewer failure locations throughout Jackson.

2.2 Delays

JXN Water previously requested a 60-day extension for the deadline to submit an Implementation Schedule for the Priority Projects. The schedule for Priority Projects is included in this report. A more complete evaluation of the Savanna WWTP is currently underway and some of the Priority Projects related to that treatment plant may vary in scope from the preliminary list included as Appendix A to the Order. It is expected that the updated list of priority projects will be available for the October 2024 Quarterly Report.

2.3 Modifications to Sewer Project Priority List and Implementation Schedule

Project 8 in Appendix A is listed as Savanna WWTP Emergency Repairs/Replace Dewatering Equipment. The project elements listed in the Appendix A are being evaluated along with other improvements that will reduce prohibited bypasses and improve compliance with the facility’s NPDES permit. Similarly, Project 11 Savanna WWTP Phase 1B, Type 2 Improvements are also being evaluated and the elements listed will likely change. The list will be updated when this assessment is complete and is anticipated to ready in time for the October Quarterly Report. A preliminary implementation schedule for the Priority Projects is shown in Table 7 below:

Table 7. JXN Water Master Schedule for Priority Projects				
Priority Ranking	Project Name	Project Description	Work Accomplished To-Date	Complete
1	Queens Area Sewer Rehabilitation Project	Rehabilitation of the sewers within the Queens Project Area 3-6 focusing on, but not necessarily limited to, dry weather SSO reduction and point repairs to address sewer line collapses.	Approximately 3,000 linear feet of Cleaning and CCTV completed. Three point repairs completed. Two point repairs underway.	12/31/2025
2	Emergency Sewer Failures	Complete cleaning and closed-circuit television (CCTV) for the rehabilitation and/or replacement of the Emergency Sewer Failure locations listed in Appendix C.	45 issues completed. 44 issues in progress.	12/31/2025
3	Annual Sewer Cleaning & CCTV Contract	Contract for annual sewer cleaning and CCTV, and complete 100 miles/year. Coordinate this annual cleaning and CCTV work with the prioritized Service Request Investigations below.	125,000 linear feet of cleaning and CCTV.	12/31/2024
4	Investigate Service Request Locations	Contract an annual investigation of sewer issues coming from the 2,200 Service Request locations and coordinate cleaning and CCTV with the Annual Sewer Cleaning & CCTV Contract above. Work to be done included in existing contracts with Q Solutions and Time and Material cleaning and inspection contracts.	There are less than 900 Service Request locations still being evaluated. All others have been addressed.	12/31/2024
5	Mill Street Sewer Rehabilitation Project	Re-route 2,200 linear feet of sewer that crosses a railroad (RR) yard, where the sewer line has collapsed underneath the RR tracks. A new sewer line will be constructed around the RR yard and the existing sewer line will be filled with flowable fill and abandoned in place.	Re-evaluation of the project is underway.	This project requires complete reevaluation. Reevaluation complete 12/31/2024. Construction schedule to be included in reevaluation. Construction complete TBD
6	West Bank Interceptor Rehabilitation	Complete the cleaning and rehabilitation of the West Bank Interceptor (WBI) for Project 6 Segment Phase (MH IT0118 to MH IT0136). This repair will address the low manhole that is believed to be a major contributing source of inflow during a river stage in excess of 26 ft. The project will also address any needed grouting work of the interceptor and manholes in the Country Club area of the WBI. Identify additional major river water inflow locations and defects causing significant volumes during a river stage above 26 ft. Develop and implement the repair plan, including a schedule of implementation.	Re-evaluation of the project is underway.	This project requires complete reevaluation. Reevaluation complete 12/31/2024. Construction schedule to be included in reevaluation. Construction complete TBD

7	Savanna WWTP 100 MGD Peak Flow Wastewater Pump	Replace the 100 million gallons per day (MGD) Peak Flow Pump that discharges flow from the Influent Pump Station to the Stormwater Lagoon cells. USACE to purchase and install new pump with VFD.	USACE solicited bids from contractors for replacement pump and motor.	Complete 9/30/2026
8	Savanna WWTP Emergency Repairs/Replace Dewatering Equipment	Replace 54-inch line from inside Influent Pump Station to Headworks, replace return activated sludge (RAS) Pump # 2, and install permanent dewatering equipment to eliminate monthly cost for renting two belt filter presses.		Reevaluation Complete 12/31/2024. Needs Reevaluation to prioritize most critical improvements.
9	Savanna Peak Cell Lagoon Cells	Clean out the three peak flow lagoon cells at the Savanna WWTP.	Initiated development of contract Scope of work. Conducted survey of solids build up.	Complete 10/31/2026
10	Trahan WWTP Rehabilitation	Conduct a Comprehensive Performance Evaluation and a Composite Correction Program (CCP) for the Trahan WWTP. Implement the CCP as schedule permits. Make immediate repairs to maintain operations as needed.	Implementation schedule to be determined in CCP	CCP Complete 12/31/2025
11	Savanna WWTP Phase 1B Type 2 Improvements	Construct new septage/Fat, Oils, and Grease (FOG) receiving station, rehabilitate one screw pump at the Effluent Pump Station, add 6th secondary clarifier, add new dewatering equipment, add covered sludge storage facilities along with new waste activated sludge (WAS) storage tank, construct new gravity thickeners, address structural deterioration in Influent Pump Stations, and rehabilitate the 84-inch line from Sludge Lagoons to Pump Station.	This project requires complete reevaluation. Reevaluation complete 12/31/2024. Construction schedule to be included in reevaluation.	Reevaluation complete 12/31/2024. Construction complete TBD

Table 8 shows the list of Emergency Repairs from Appendix C of the Stipulated Order, including the status of work completed and pending for this quarter. The following summarizes the status of the emergency repairs during this quarter:

- Complete for Quarter – 45 (All issue/repair has been complete)
- In Progress for Quarter – 44 (Work has started has been assigned)
- Pending for Quarter – 126 (on list but has not been assigned or type of repair confirmed yet)

The total of 218 shown in Table 8 is due to three duplicate locations and actual count of repairs is 215.

2.4 Accounting of Expenditures

Of the accounts listed in the Order, only the Supplemental Environmental Project Fund was received by the ITPM during the reporting period. No expenses were made from that account and the balance as of December 31, 2023, was \$650,318.64.

Table 9 below shows expenditures from the Sewer O&M account funded by the local revenues collected. Table 10 shows expenditures from the Professional Services account, also funded by local revenues with the exception of the ITPM Compensation, which is funded with interest earned on JXN Water accounts.

Table 9. JXN Water Sewer O&M Account Transactions

JXN Water			
Sewer O&M Account Transactions			
January - December 2023			
	Name	Amount	Description of Services
	Anding Construction Services	598,796.54	Point repairs - Line Replacement

2.5 Projection of Work for Upcoming Quarter

JXN Water Sewer Cleaning and CCTV Contractors will continue to clean and televise the sewer system throughout the City. This work will focus on known issue locations that have not been previously evaluated. Also, new locations with issues called in by residents and businesses throughout the City will continue to be evaluated.

JXN Water will continue to prioritize sewer repairs based on the impacts it causes to its customers, first addressing overflows or backups to structures and sensitive properties (playground, schools, healthcare, and high traffic/safety issues). JXN Water plans to perform the following during the next quarter:

- Clean and CCTV 20-25 miles of sewer throughout the city's sewer system
- Perform around 30 to 40 construction sewer repairs fixing collapses.
- Perform Cured in Place Pipe(CIPP)construction of approximately 4,000 linear feet (lf) of sewer

2.6 Financial Statement (reports submitted in January only)

No audited financial statement is available at this time.

2.7 Trends Analysis (reports submitted in April only)

As part of the requirements of the Stipulated Order, a Trends Analysis is not required for this Quarterly Reporting period. The Trends Analysis will be provided in the April Quarterly Report.

2.8 Proposed ITPM Professional Sewer Budget for Upcoming Fiscal Year (reports submitted in July only)

Appendix A - Historical Sanitary Sewer Overflows (Prior to Effective Date)

Sanitary Sewer Overflows existing prior to the effective date that remain active. JXN Water is working to resolve all SSOs and will remove these from future reports once resolved.
